CAREER

Current Positions

President and founder of SYSTSERV SA. SYSTSERV (SYSTEMS AND SERVICES) is an innovative organization in medical Informatics and clinical telemedicine technology. It has been founded in 2013 by researchers with experience in designing and developing ICT systems and services.

Teaching fellow, Department of Surgery, School of Medicine University of Patras (September 2014-present)

Adjunct Professor, TEI Patras, Department of Applications of Informatics to Management and Economics, Greece (2010-2013) (<http://www.amaliada.teipat.gr/>)

Adjunct Professor, TEI Patras, Department of Informatics to Management and Economics, Greece (2009-2010) (<http://www.amaliada.teipat.gr/>)

Scientific Instructor, of Telemedicine Unit of University of Patras Greece (2004-2014) <http://www.telemedicine.upatras.gr>

Laboratory Professor, Department of Medical Physics, School of Medicine University of Patras (September 2005-2014)

Chief network administrator for one of the University of Patras largest department- School of Medicine (28/8/2004-present).

Research Fellow at the Laboratory for Graphics, Multimedia and GIS of the Department of Computer Engineering and Informatics (CEID) of University of Patras.

Research Interests

His main research interests include Telemedicine, Collaborative healthcare systems, Telesurgery, Telediagnosis, Robotics, Data Mining in Medical databases, and Artificial Intelligence, Biological Image Analysis, and Modeling of physiological systems and processes.

Education

Ph.D., Medical Informatics, University of Patras, Rio, Greece, December 2004

M.Sc., Medical Physics, University of Patras, Rio, Greece, July 2001

B.S., Physics, University of Patras, Rio, Greece, July 1998

Employment in Research Labs & Institutes

Researcher, Industrial Systems Institute (INBIS/ISI), Foundation for Research and Technology-Hellas (01/11/2002–31/12/2003). **INNACT** project, **ACTION 3**: Use of innovative services in the health and safety sectors for the citizens, **TITLE: Peace of mind residential e-services.**

Research Intern, Evaluation of WinVicos system in SuperFast ferries via EUTELSAT. Project title: **An INTEgrated broadband telecommunication pilot teleservices-platform for improving health care provision in the Region of MEDiterranean (INTERMED)**, Charité Hospital, Germany and National Research Centre for Physical Sciences (NRCPS) Demokritos, National Foundation for Research and Technology-Greece (2003-2005)

Ph.D. Dissertation

Title: **Design methodologies for supporting Telediagnostic and Telesurgical services over web**

Advisor: Prof. George Nikiforidis.

Projects and Consultancy Experience

He has served as a:

- **Project leader** in E.U. IT Project, entitled “Internet Platform for Organization – Exploitation & Promotion of Conference Tourism and Other Cultural Exhibitions” Project funded in the context of the EU/2005, Western Greece, Budget 118.048 € (SAEP 001/3).
- **Project leader** in E.U. IT Project entitled ” Digitalization of the Contents of Pyrgos” Project funded in the context of the EU/94912/002, Western Greece, Budget 77.600€ € (SAEP 3882).
- **Project Designer** in E.U. IT Project entitled “A System For Supporting Electronic Services To Citizens Of Pyrgos” Project funded in the context of Information Society, Minister of Development, Greece.
- **Sub-investigator** in Pfizer Project, entitled “An International Multicentre, Open Label Study To Access The Effectiveness of Amlodipine -Atorvastatin Combination In Subjects With Hypertension and Dyslipidaemia” (The JEWEL II Study). Protocol number: A3841029.
- **Sub-investigator** in project EPET II (EKBAN) entitled “New Services For Tele-Management Of Building Processes Based On Internet Technologies And Building-Home Automation Systems” (01/2001-12/2002).
- **Researcher**, Industrial Systems Institute (I.S.I.), Project’s title: “Development And Demonstration Of An Innovative System For Provision Of A Bundle Of Residential Peace Of Mind E-Services”, INNACT-RWG (2002-2004).
- **Researcher**, EU Project IST-2001-38911: Self Organized Of Connectionist Intelligent Agents Capable Of Learning (01.01.2003 - 31.06.2004).
- **Consultant** of Hellenic National Foundation of Research (1/1/2003-1/1/2004).

System Implementation Experience

University Hospital of Patras (03/2003 to present): Working as a senior researcher he has designed the following systems:

- **SatelliteAngio (2006-2007)** was an innovative R&D project that included the designing and the implementation of a Collaborative clinical system to support the Collaborative Work During Interventional Radiological Procedures Based on a Multicast Satellite-Terrestrial Network. Foundational work in improving modules of composite solutions built on a prototype Wavelet based interactive Video communication system wavelet codec Partition, Aggregation and Conditional Coding (PACC), and an integrated satellite-terrestrial network via EUTELSAT. Team size: 14 technical staff members.
- **NetAngio (2005-2006)** was an innovative R&D project that included the designing and the implementation of a Collaborative clinical system to provide “on the fly” heterogeneous collaboration to support IRP providing interoperating essential services. Foundational work in improving modules of composite solutions built on MS Web Services and middleware products. Team size: 5 technical staff members.
- **NetCardio (2005-2006)** was an innovative R&D project that included the designing and the implementation of a Collaborative clinical system to support over web synchronous and asynchronous data management, real-time multimedia data telemonitoring and continuous telementoring during interventional cardiology facilities. Foundational work in improving modules of composite solutions built on Java Media Framework (JMF) and API technologies. Team size: 5 technical staff members.
- **e-HS (2003-2004)** was an innovative R&D project that included the designing and the implementation of a Collaborative clinical system to support useful haematological services via WWW. Foundational work in improving modules of composite solutions built on MS Web Services and middleware products. Team size: 4 technical staff members.
- **NetUro (2002-2003)** was an innovative R&D project that included the designing and the implementation of a

Collaborative clinical system to support a Web-enabled network for diagnostic and therapeutic guidance in urology. Foundational work in improving modules of composite solutions built on MS Web Services and GRID technologies. Team size: 4 technical staff members.
